<div align="center">One Way to Use Armitage(GUI for Metasploit)</div>
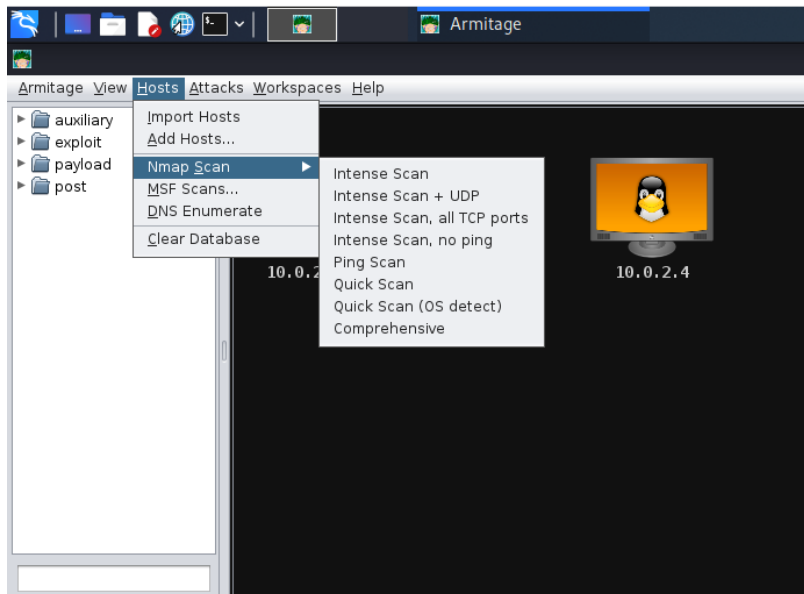

1. Open Armitage and input password to start the Metasploit database(msfdb) as a super user.

2. Select target host

3. Choose any number of scanning tools

4. If desired, attack target host. Use the "Find Attacks" option to find attacks based on the

results of the scan or use the "Hail Mary" option to use all possible attacks on the

target(s).
